COMMENTS***Reasons For Allowance***

The following is an examiner's statement of reasons for allowance: claim 1 defines a method for forming a trim cover assembly for an automotive seat. The method is defined by the steps of providing a first cover material and a second cover material and a reinforcing material. Placing the second material on the reinforcing material and the first material over the second material. Aligning the edges of the three materials and sewing a first line of stitching. Cutting off a portion of the sewn connection so as to form a shortened sewn connection portion thus transforming said margin into a reduced margin. Turning over the reinforcing material in the direction to the reduced margin. Turning over the first cover material in the same direction so that the reverse side of the first cover material is placed on the reinforcing material with the shortened connection portion between the turned over first material and the reinforcing material. Sewing together both the first cover material and the reinforcing material along a given second sewing line, whereupon there are defined one sewn unit of the first cover material and the second cover material with the second seam being created on the outer side of the first cover material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
